CRUD Files

Method	Description
open('file': string, "mode: string = 'r')	Opens file and returns a stream. Raises OSError upon failure.
close()	Flushes and closes the IO object.
read(size:int =-1) -> string	Reads at most n characters from stream.
readable() -> bool	Returns whether the file stream can be read or not.
readlines(size:int =-1) -> list	Reads all the lines and returns them as each line a string element in a list.

Method	Description
write(text) **->** int	Writes string to stream and Returns the number of characters written (which is always equal to the length of the string).
remove(path: string or bytes object, *, dir_fd=None)	Removes a file (same as unlink()).
os.rename(src: string, dst: string)	Renames a file
